

Zonnestelsel

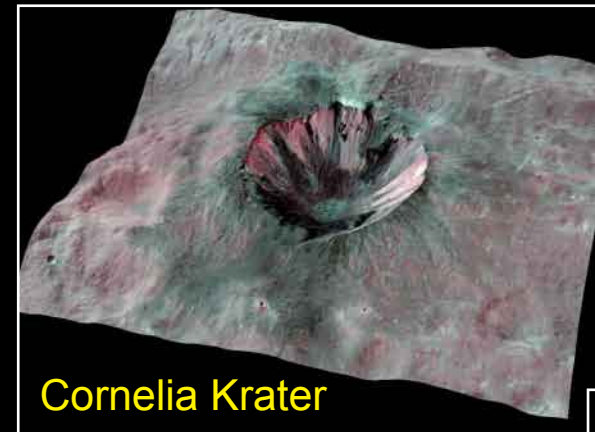

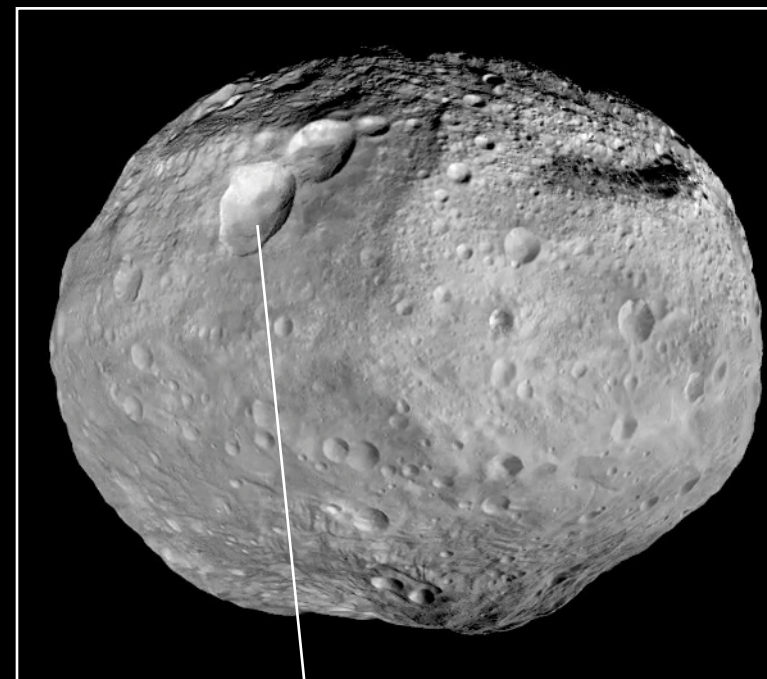

Planetoiden: Vesta

'Sneeuwman' kraters

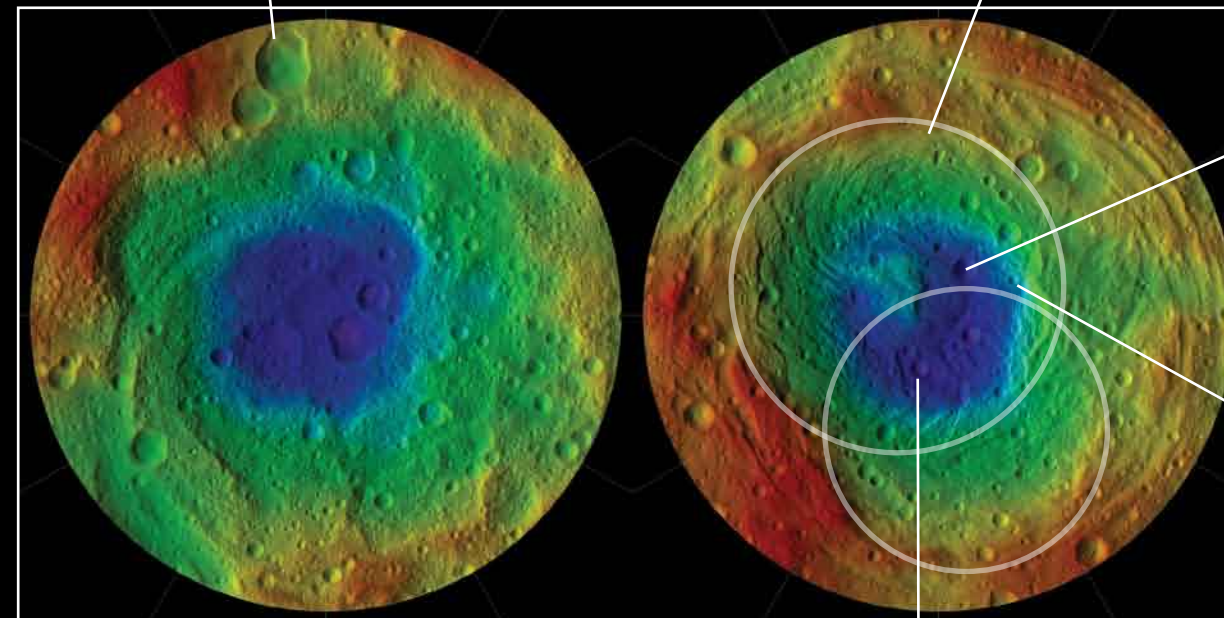

Divalia Fossa, 465 km lange slenk (langer dan Grand Canyon!), mogelijk ontstaan bij Rheasilvia en Veneneia inslagen.

Cornelia Krater

Rheasilvia bassin
(ca. 1 miljard jaar)

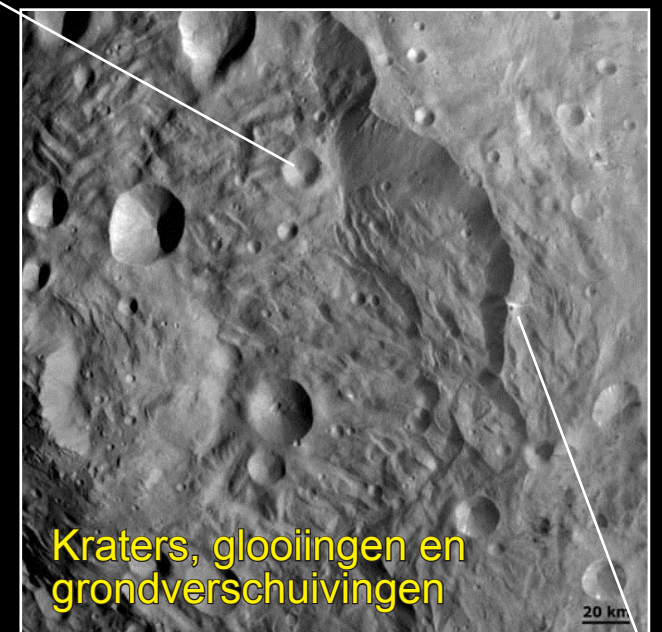

Noordelijke (links) en zuidelijke halfronden.
Kraters (laagten) groen en blauw. Slenken,
parallel aan equator (niet getoond), in
beide foto's.

Veneneia bassin
(> 2 miljard jaar)

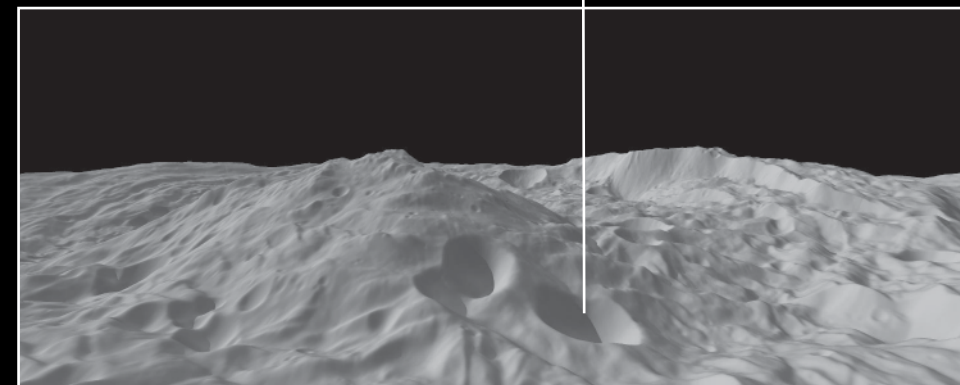

Rheasilvia inslagbassin (500 km)

Kraters, glooiingen en
grondverschuivingen

20 km

Zuidpoolgebied,
opname van opzij.
